

24-Hour Nurse Line

is always here for you

Health concerns can pop up when you least expect them. You might be on vacation or on a business trip, or your child may have a fever in the middle of the night. When the unexpected happens, day or night, you have somewhere to turn.

Call 24-Hour Nurse Line at **800-424-8814**. A registered nurse will talk with you about your health concern. Whether it's a question about allergies, fever, types of preventive care, or any other topic, nurses are always there to give you support and peace of mind. A nurse also can call you back later to see how you're doing.

In addition, Spanish-speaking nurses and translators are on call to help you. TTY/TDD services are available, too. If your doctor isn't available, nurses at 24-Hour Nurse Line can help you decide where to go for care. Should you wait to see your doctor, go to an urgent care center, or head to the emergency room? Making the right choice can give you access to the best possible care, and save you time and money.

Registered nurses are just a call away

24-Hour Nurse Line is available to you anytime.
