

A message from Texas Health and Human Services Commission (HHSC)

Share Your Insights: Help Improve Continuous Glucose Monitor Access in Texas

Texas | Medicaid

We invite you to complete a brief (5-minute) survey to help the Texas Health and Human Services Commission (HHSC) better understand provider knowledge, confidence, and barriers related to prescribing Continuous Glucose Monitors (CGMs).

Your anonymous feedback will help shape resources and support materials to make it easier for providers like you to integrate CGMs into clinical practice — and ultimately, improve care for clients with diabetes.

Recent Texas Medicaid policy updates include:

- Removal of prior restrictions on insulin administration frequency and blood glucose monitoring.
- Expanded eligibility to include individuals with gestational diabetes, per FDA guidelines.

If you belong to multiple MCOs, you may receive this email more than once; please only complete the survey one time.

Click [here](#) or copy and paste the below website to complete our survey:

<https://sw2.decipherinc.com/survey/selfserve/434c/250501>

The survey will remain open through June 23, but we ask that you please complete it only once.

Thank you for your time and dedication to improving diabetes care across Texas!
