

Clinical Utilization Management Guidelines

Texas | Medicaid

Below is a list of the Clinical Utilization Management (UM) Guidelines Wellpoint has adopted.

The full list of Medical Policies and Clinical UM Guidelines is publicly available on the [Medical Policy and Clinical UM Guideline subsidiary website](#). Their purpose is to help you provide quality care by reducing inappropriate use of medical resources.

MCG Care Guidelines or InterQual® Level of Care Criteria (based on specific provider contracts) are used for:

- Medical necessity review for medical and behavioral health inpatient review.
- Inpatient site of service appropriateness.
- Inpatient rehabilitation and skilled nursing facility review.
- Outpatient-based service(s) or procedure(s) where there is not an established Medical Policy or Clinical UM Guideline.

In addition, for behavioral health services, the American Society for Addiction Medicine® (ASAM) Patient Placement Criteria are used for substance use disorder treatment authorizations, with the exception of detoxification, which uses MCG Care Guidelines.

Medicaid state contracts, regulatory guidance, CMS requirements, and our Medical Policy/Clinical UM Guidelines supersede MCG Care Guidelines and InterQual Criteria.

Note: We make determinations of medical necessity on a case-by-case basis in accordance with the definition of medical necessity that is contained within the Medicaid state contract, regulatory guidance, CMS requirements, or in our Medical Necessity Criteria Policy ADMIN.00004.

If the request does not meet established criteria guidelines, it will be referred to a licensed physician reviewer with the appropriate clinical expertise to make a decision.

The Clinical Utilization Management Guidelines (CUMG) below, which are indicated as *new*, were adopted by the medical operations committee for Medicaid members.
